

“Wave6 played an important role in developing and implementing a custom product catalogue solution for Perrigo on the Salesforce1 platform. The Wave6 team enabled Perrigo to quickly develop a solution that had immediate impact to our sales users by helping reduce a process that took days down to hours. We will continue to look to them as part of our team to enhance our salesforce environment and user experience.”

Aaron James
Director of IT
Perrigo

LEVERAGING THE LEADING ENTERPRISE APPLICATION PLATFORM AS A SERVICE

In 2014 Gartner named the Salesforce1 platform the leading Enterprise Application Platform as a Service. How can you utilize the Salesforce1 platform?

LEVERAGING THE SALESFORCE1 PLATFORM

Salesforce.com customers have the world’s most advanced platform for rapid and scalable development of business applications for web, mobile and tablet based deployments.

Our clients are leveraging Salesforce1 as a strategic component of their overall technology stacks to deliver a wide variety of applications.

Projects include:

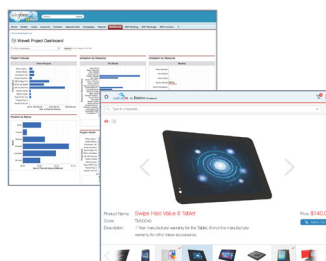

- Traditional Force.com/Salesforce1 applications that extend core Sales and Service Clouds to related business functions.
- Salesforce1 applications for functions outside of traditional sales and marketing, such as core operations.
- Salesforce1 based mobile and tablet based applications that provide necessary functionality in the hands of users.
- Hybrid Mobile, Tablet and Web based applications that combine Salesforce1’s API functionality in environments utilizing HTML5 and other applications.

WAVE6 SALESFORCE1 SERVICES

Wave6 provides a variety of application development services to help customers through visioning, design, development, quality assurance and ongoing maintenance and management of applications that leverage the Salesforce1 platform.

Services include:

- New Salesforce1 Application Development for Browsers, Mobile, Communities
- Custom UI/UX Design and Development for Salesforce1
- Certified Salesforce1 Developers, Analysts and Project Management Services
- Application Development Platform Selections
- Flexible Onshore and Offshore Development Services
- Code Reviews - Customization Assessments
- SuccessWave Services including DeveloperWave and QualityWave to Provide On Demand Development Resources and Automated Quality Assurance
- Major and Minor Release Product Development Management
- Data Integration and Master Data Management services
- AppExchange Application Development
